# Agenda

- Business Value
- Enable Copilot in Modern Apps
- Chat with Copilot
- Live demo
- Resources
- Call for Action

Business Value

# Why enable “Copilot Side Pane Chat on 365 Field Service web application”?

Copilot is an advanced AI assistant designed to boost your productivity in the Dynamics 365 Field Service web app. You can interact with Copilot through a chat interface in natural language.

- **Summarize work orders:** Copilot provides concise summaries of work orders, saving you time and ensuring you have all the key details at a glance.
- **Update on recent record changes:** Stay informed with real-time updates on any changes to records, helping you stay current and responsive.
- **Preparation for onsite visits:** Copilot assists you in preparing for onsite visits by compiling necessary information and reminders, ensuring you're fully equipped.
- **Answer related queries:** Engage in natural language conversations with Copilot to get quick and accurate answers to any questions related to your tasks.

# Enable Copilot in Modern Apps

## Prerequisites and Licensing

- As an administrator enable “copilot for model-driven apps feature for your environment”
- Depending where your environment is hosted, you must enable “Move data across regions ”
- Dynamics 365 Field Service License is required to access

# Add Copilot for app users in model-driven apps
